BUSINESS REQUIREMENTS DOCUMENT (BRD)

Virtual Punya Snan Website

1. Project Overview

The purpose of this project is to create a simple website for a service that helps devotees who cannot physically attend a sacred bathing event. The devotee can provide a photograph, and the service provider performs the related ritual using the photograph and records a video which is later shared with the devotee.

2. Main Purpose of the Website

The website will give people clear information about the service and make it easy for them to understand the process and contact or request the service.

• Explain the service in simple language.

• Show how the process works.

• Provide information about the related religious event.

• Allow users to contact the service provider or submit a service request.

• Build trust through a clean and professional online presence.

3. Target Users

The website is mainly for devotees who cannot personally travel to the religious event because of distance, age, health, work, family responsibilities, or other personal reasons.

4. Proposed Website Pages

Page	Purpose
Home	Introduce the service and provide a clear call-to-action.
About Us	Explain the background and purpose of the service.
How It Works	Explain the complete process step by step.
Event Information	Show the event name, location, dates and important information.
Service / Booking	Allow users to submit required details and photograph, if confirmed.
Contact Us	Provide phone, WhatsApp, email and other contact details.

5. Main Website Features

• Simple and mobile-friendly design.

• Clear information about the service.

• Simple step-by-step explanation of the process.

• Photo upload option, if required by the final service process.

• Simple service request/contact form.

• WhatsApp or phone contact option.

• Basic event information section.

• Basic FAQ section, if required.

6. Basic User Flow

User visits website → Understands the service → Checks how it works → Checks event information → Submits a request/contact form and photograph if required → Service provider processes the request → Ritual is performed → Video is recorded → Video is shared with the user.

7. Technology & Hosting

• Proposed technology: HTML5, CSS3 and JavaScript.

• The website should be simple, lightweight and easy to maintain.

• Hostinger will be used for hosting, as access has already been provided.

• Final technology can be confirmed before development starts.

8. Information Required From the Client

• Final service/business name and logo.

• Exact event name, location and dates.

• Service description and process details.

• Service price, if applicable.

• Phone/WhatsApp number and email address.

• Photos/videos to be used on the website.

• Payment method, if online payment is required.

• Final method for delivering the recorded video.

9. Points to Confirm Before Development

• What is the exact upcoming event and location?

• Will users submit their photograph directly through the website?

• Is online payment required?

• How will the final video be sent to the user?

• Is a booking/order system required, or is a simple enquiry form enough?

• What exact information should users provide?

10. Project Scope

The first version of the website will be kept simple and focused only on the main business need: explaining the service, showing the process, providing event information, and allowing users to contact or request the service. Advanced features will not be added unless specifically required and approved by the client.

11. Client Confirmation

The above requirements are based on the initial discussion about the business concept. The client should review and confirm the requirements before development begins.
